

the automatic draft excluder

Universal series item 1350 tubo

Comaglio

technical data sheet

Standard application

scale 1:1

Function: sealing the gap between the door and the floor to eliminate air drafts, dust infiltrations, insects, and smoke and to reduce noise transition.

Features: fixed profile with gasket applicable on the threshold to the floor; the sealing of the door compresses the gasket for an airtight seal.

Fixing system: through pre-drilled holes on the aluminium profile.

Component materials: extruded profile in raw aluminium alloy 6060; extruded compact EPDM profile (working temperature -35° $+90^{\circ}$).
